**To:** Rohlfes, Larry@DTSC; Kracov, Gideon@DTSC  
**Subject:** IRP comments awaiting response

I wrote several comments that were read into the record that were specifically related to the actions of DTSC, the behavior of the "Public participation" process as created and obstructed by DTSC, and also asked direct questions about how the staffer independent of the department was working for the Director, answer her phone, while receiving all inquiries through his email for the IRP?

My questions have not been answered and no response whatsoever has been taken.

I reiterate my request to meet with the panel, and since you all fly up from LA to attend the meetings and I live in LA, I hereby request to meet with the panel in the Los Angeles area.

We should not be forced to travel in order to be heard. By the looks of your meeting, it is not designed to have the public be part of it. I happen to know that no one at Santa Susana has been informed of even the existence of this panel. Is that my job, really?

I believe it is obvious that there are severe problems with public outreach by the department. Denise Duffield usually spends her time writing about me, but on this, we agree that the department is beyond captured and if you don't look into the process — the public process as created by DTSC's fake CAG, not dissimilar to the Exide Advisory Group which have also been manipulated to ask for things that are contrary to their protection. I have requested to participate in the Exide Advisory Group, and we'll see how transparent it is, since it is chair'd by Dan Hirsch's former partner. As long as he controls the strings, they can look forward to decades of non-action through CEQA-speak, and misuse of the Environmental Quality Act for the purpose of defending the polluter instead of finding real solutions to protecting the children and citizens of Exide.

Sincerely,

Christina Walsh
